## 2006 Taipei International Cycle Show Light Electric Vehicle International Conference

With the pressing needs of environmental protection, “green production” and “green consumption” has become an important global concern. The pollution and oil consumption from all vehicles used in metropolitan areas are drawing more attentions. Taiwan’s government believe that it’s good timing to promote development of electric vehicles and has listed high efficiency light electric vehicle into “ Challenge 2008: Key project of national development plan (2002- 2007)”, which aimed to make Taiwan into the global center of light electric vehicle design, R&D, production and marketing center. In recent years, Taiwan has established a profound LEV industry, including electric bike, electric scooter, electric mobility and small electric scooter.

Light Electric Vehicle International Conference and Exhibition has become one of the major attractions in Taipei Cycle Show during last two years. The LEV International Conference and Exhibition, co-organized by Material and Chemical Laboratories/ Industrial Technology Research Institute (MCL/ITRI) and Taiwan External Trade Development Council (TAITRA), will be held on March 9 &10 and will invite speakers from USA, Germany, Japan, Switzerland, Italy, Belgium, China and Taiwan. More than 250 attendees are expected to participate the conference and 18 major LEV key players are expected to join the Cycle Show.
